Work History

2015-02 - present **Full-stack PHP Developer**
Bibby Financial Services Poland, Warsaw

I create applications and tools using PHP7, MVC frameworks (CodeIgniter, Symfony), Doctrine ORM. In details:

- developing features supporting new financial products (mass factoring),
- platform integrations (factoring core system - AQUARIUS, BOS),
- I've successfully introduced Split Payment support for factoring products,
- electronic invoicing, government reporting (JPK, VAT payer White List),
- integrations with data suppliers and external services,
- programming advanced reports, dashboards (web based),
- software migration and deployment (Azure DevOps),
- cooperation with headquarter teams from UK in case of deployment process and further maintenance.

2009-03 - present **Full-stack PHP Developer**
Self-employed / freelancer

Developing small and big projects based mainly on web technologies on fields such as:

- mobile services (SMS advertising campaigns, SMS MT services),
- sales support, reporting, dashboards (programming for Fiat Auto Poland S.A. in cooperation with Unicorn Interactive Agency),
- system integrations (also for Fiat Auto Poland S.A.),
- CRM solutions, electronic documents workflow, e-invoicing systems (for Bibby Financial Services Sp. z o.o.),
- advertising (landing pages, competitions, consulting)

2008-10 - 2010-12 **Vice President of Information Technology**
3BEE Sp. z o.o., Warsaw

Sharing knowledge and experience in mobile applications development. Searching for new technologies and opportunities to support the growth of business. Creating social media applications, mainly on Facebook.

2005-05 - 2008-04 **Dev Team Manager**
adMobile Sp. z o.o., Warsaw

Responsible for mobile applications development and deployment. Leading main project of creating SMS exchange system from scratch. Main technologies used that time: Java, MySQL, database clustering, Web Services based on XML-RPC and SOAP.

Education

1999-10 - 2005-04	**Master of science, Computer Engineering** Warsaw University of Technology, Warsaw

Courses

2019-03	**Angular in Space**
2015-12	**Ruby on Rails**
